

Beyma updates LX60

BEYMA HAS updated its LX60 subwoofer family to the LX60V2 range, consisting of the 12-inch 12LX60V2, 15-inch 15LX60V2 and 18-inch 18LX60V2. The new units feature the same response and have equivalent parameters to the LX60 family, such as 1,400W power capacity. However, the LX60V2 feature improvements such as waterproofing treatment for both sides of the cone; an FEA optimised magnetic circuit which, along with the MMSS suspension system design, provides a controlled, linear and symmetric behaviour of the moving assembly; new 4-inch Duo double layer inner/outer voice coil and the new Conex spiders for higher resistance and consistency.
