

BEYMA P1000FE

The Beyma P1000Fe loudspeakers incorporate technologies used in the P1200Nd and P1000Nd series, but use a lower cost Ferrite magnetic system. The P1000Fe models are available in 18-inch and 15-inch formats, offering high sensitivity (>97dB @ 2.83V), 1kW AES power handling, a low resonant frequency (<39Hz), extended and controlled excursion ($X_{max} \pm 7.5\text{mm}$) and a weather resistant paper cone doped with fibres for extreme rigidity. Both models incorporate the Beyma Mechanical Mirror Suspension System (MMSS), Double Conex Spider technology (DCS) and a Duo technology 4-inch voice coil.
